

Use of Multispectral imagery to enhance aquaculture operations

Avik Nandy, University of Queensland

Dr. Simon Albert, Prof. Stuart Phinn, Dr. Alistair Grinham

Driven by my passion for advancing R&D in sustainable practices, I pursued a PhD with the Blue Economy CRC to develop innovative solutions, build knowledge and see the bigger picture.

Following my PhD, I aspire to connect multidisciplinary approaches, integrating earth observation and water research, building data infrastructure, and merge BECRC's vision with Australia's AquaWatch mission.
