

<b>Project</b>	Data Infrastructure Design for the Blue Economy
<b>From:</b>	Dr Louise Bruce
<b>Date:</b>	26 July 2023
<b>Subject:</b>	Brief and tentative agenda – Stakeholder Workshop 2 (11 and 18 <sup>th</sup> August 2023)

## Workshop Brief

The Data Infrastructure Design for the Blue Economy (DIDBE) project will bring together digital experts, data scientists, engagement specialists, project partners, stakeholders and end-users through a series of workshops. As part of the design process BMT will be hosting a series of seven design workshops. The “odd” workshops (1, 3, 5 and 7) will include the core design team with a focus on the technical aspects of design and the “even” workshops (2, 4, 6) will bring together the core design team with stakeholders and intended end-users of the data infrastructure.

One of the key deliverables for the DIDBE project is the design concept map, a high-level, graphic of software architecture used in the development of the data infrastructure platform. The conceptual map along with a demonstration prototype will be used to demonstrate the design with details that can be understood by end users. During the stakeholder workshops, the aim will be to gather as much feedback and information from industry, researchers and end-users to help inform and support the design of the concept map and demonstration prototype. By incorporating stakeholder feedback, the intent is a co-design approach to ensure long term usability and relevance to users. Collection of feedback will not be limited to workshops only, and additional meetings and targeted interviews will further add to the data gathering exercise.

The first stakeholder workshop (Workshop 2 overall) will be held across two identical sessions in order to maximise attendance and ensure we gather as much feedback as possible. The theme of this workshop will be a “stakeholder needs assessment” in relation to the conceptual map and use of data infrastructure.

## Proposed Agenda for Workshop 2 – Stakeholder Needs Assessment

Workshops will be held between 11am to 2:30pm AEST and 9am to 12:30pm AWST.

Table 1.1 Agenda for Session 1 (11 August) and 2 (18 August)

Topic	Allocated time
Introduction and findings to date	1 hour
Stakeholder needs assessment	1 hour
Features and functions	1 hour
Wrap up and discussions	30 mins
